

# Les masses

Kilogramme  
**kg**

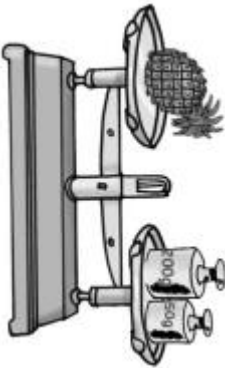

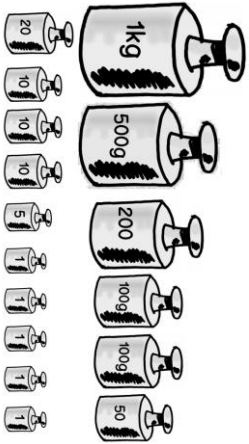

Gramme  
**g**

Pour peser l'objet, il faut équilibrer les plateaux de la balance en utilisant des masses marquées.

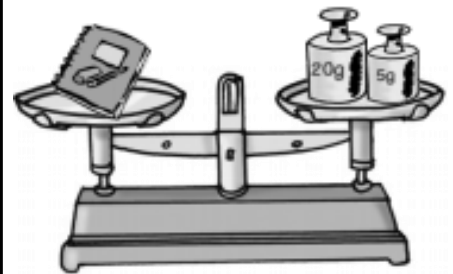

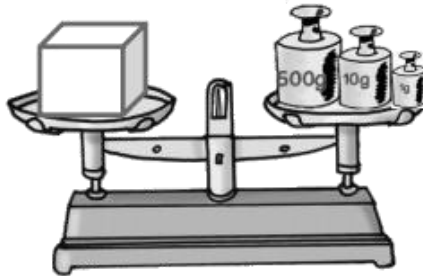

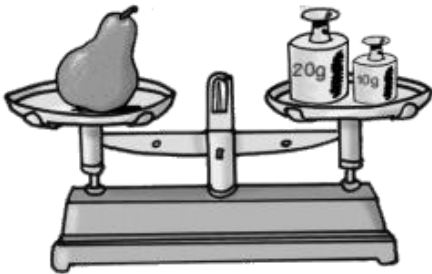

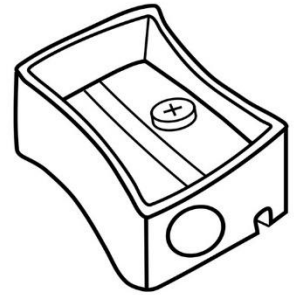

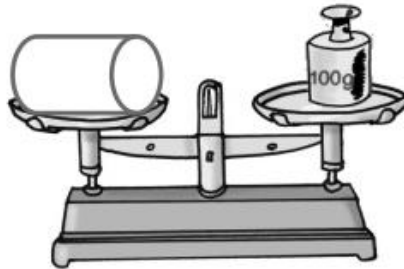

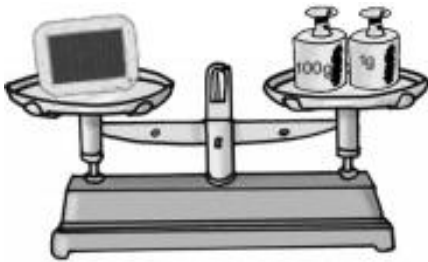

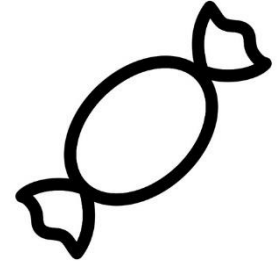

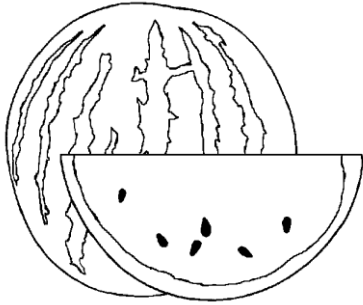

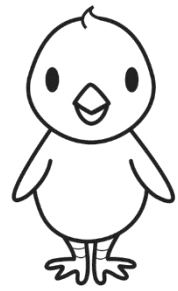

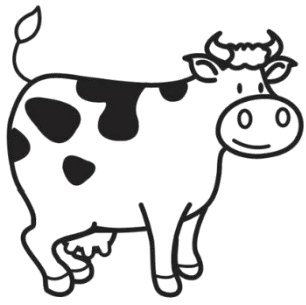

La masse de l'objet est égale au total des masses marquées utilisées.

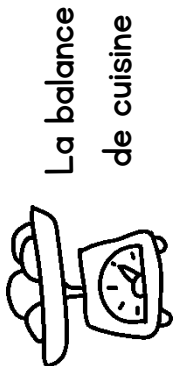

Conversion à connaître :

■  $1 \text{ kg} = 1\,000 \text{ g}$

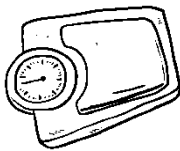

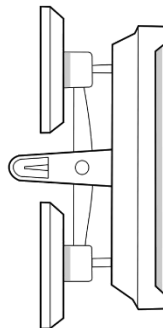

Les instruments  
de mesure

La balance  
de cuisine

Le pèse-  
personne

La balance de Roberval  
(à plateaux)
